Smart_Boys_Count

Overall Top 15 PPlayers

Top 15 Undervalued Players

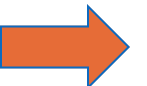

AdjImpact_Size - Overall Top 15 Players - calculated based on **cumulative measure** (e.g., Runs + Strike Rate adjustment + Consistency factor) - *volume + quality*.

Example: A player with 400 runs at 130 SR will have a bigger AdjImpact_Size than a player with 250 runs at 150 SR.

AdjImpact - Top 15 Undervalued Players - calculated based on **rate-based measure**, *efficiency/undervaluation*, not raw volume.

Example: A young player with fewer innings but high strike rate and consistency could rank high here even with fewer runs.
